

## Overview of metal surcharges (MTZ) for brass articles from RST

A metal surcharge is calculated for all brass articles (bare or nickel-plated) from RST based on the daily updated market prices. For this the following surcharge table is taken as a basis:

Price in € per 100 kg		MTZ type	MTZ type
		STD	KEX
150-174	=	15%	0%
175-199	=	20%	5%
200-224	=	25%	10%
225-249	=	30%	15%
250-274	=	35%	20%
275-299	=	40%	25%
300-324	=	45%	30%
325-349	=	50%	35%
350-399	=	55%	40%
400-449	=	60%	45%
450-499	=	65%	50%
500-549	=	65%	50%
550-599	=	70%	55%

More detailed information on the assignment of the „MTZ type“ can also be found in our current price list.

The surcharge is added to the individual net price of each customer. The decisive factor for calculating the MTZ is the date of submission of the order. The prices for our brass products are based on a metal price quotation of € 150 for MS 58/1. Depending on the type of article, there may be deviations from the above table.

The daily updated brass price can be found at:
