"Services" Portfolio Overview

Product Development Services:

- I. Advice and analysis before placing an order
- II. Contract conclusion and administration
- III. Development of innovative products
- IV. Handling of the communication process
- V. Tool manufacturing control

Service in the field of Cable Assembly:

I. Strand/single strand processing (0.25mm² to 95mm²)

Equipped with::

- Blade receptacles
- Wire end ferrules
- Ring terminals
- Custom contacts

II. Cable Assemblies

Equipped with::

- Round and rectangular connectors
- D-SUB miniature connectors
- sensor/actuator connectors
- IDC components

III. Our range of services also includes

- Modules including assembly and wiring (electronics housing)
- Labeling and identification of cables and lines
- Delivery in specified containers (customer specifications)
- Soldering work for small quantities
- Tinning work for small quantities
- Component potting

Areas of application

Thanks to their many different capabilities, our products and services can be used in a wide range of areas:

- Mechanical engineering and engine technology
- Automation engineering
- Measurement and control technology
- Solar and wind power
- Food industry
- Power plant technology
- Pump technology
- Petrochemical industry

Why we are the right partner for you...

Extensive and application-specific product range

Customised logistics and services

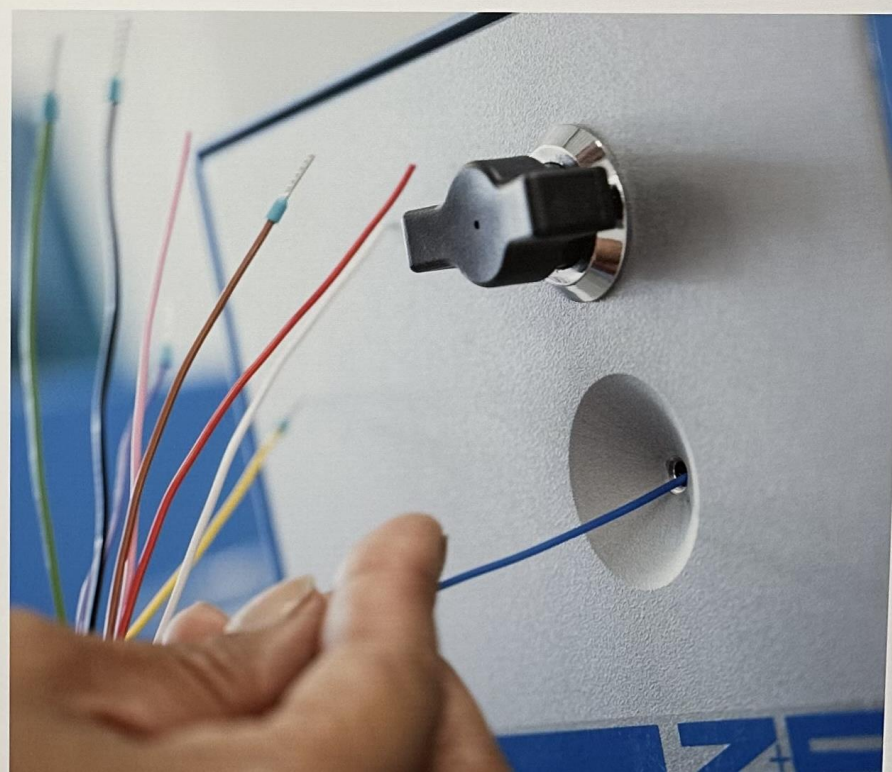

High level of innovation in conjunction with strong partners/brands

Why RST?

Who could explain it better
than our employees and
long-term partners?

Thank you for your attention!
